

TOTAL ANKLE NEXT STEPS

1. Obtain a CT Scan with the Maven protocol. A regular CT will not be sufficient. PLEASE confirm with the imaging center of the proper protocol.
2. On the day of your scan, be sure to ask for a disc of your scan results.
3. Please bring the disc to our office with attention to Dr Hunter.
4. Once you have your scan and Dr. Hunter has the disc, it takes about 8 weeks for the device company to complete the custom model.
5. Please schedule a pre-op appointment at least 4 weeks before surgery by calling 801-295-7200, ext. 178
