**CONSENT TO DIAGNOSTIC, OPERATIVE,
THERAPEUTIC, BLOOD TRANSFUSION AND
PHARMACOLOGICAL PROCEDURE**

Date of Procedure: _____

Name of Patient: _____ (type or print.)

1. I consent to the performance of the following upon the Patient, under the direction of _____, as the healthcare provider in charge; these procedures may be performed by him/her or anyone whom he/she may designate:
 - (a) Physical examinations, other routine diagnostic procedures and routine medical treatment;
 - (b) The following operative, special diagnostic or therapeutic procedures:

Neurotoxin injections

 - (c) The injection or other administration of the drugs or other substances incidental to any procedure described in subparagraphs (a) or (b) above.
 - (d) Any other procedure related or incidental to those enumerated above, if within a reasonable degree of medical certainty the procedure is necessary to avoid a substantial risk of death or immediate and serious harm to my health, and someone authorized to give consent on my behalf is not reasonably available to make the decision.
 - (e) At the option of my health care provider, the videotaping or photographing before and after any procedure for the purposes of monitoring therapy progress, diagnostic purposes or for educational or research use under circumstances in which my identity will be protected from disclosure to persons not otherwise involved in my care.

2. The health care provider has explained the benefits, alternatives (including not having the procedure(s)), and major risks to me so that I understand. These include but are not limited to:
 - (a) Bleeding, infection (wound, urinary, other), heart attack, stroke, pneumonia or respiratory failure, kidney failure, allergic reaction or anaphylaxis, blood clots, nerve damage, or even death.

- (b) Nose or throat irritation, headache, injection site pain or irritation, upper respiratory tract infection, eyelid swelling, eyelid drooping, sinus inflammation, nausea, and temporary bruising.
- (c) Distant spread of toxin effect which may produce symptoms consistent with botulinum toxin effects including asthenia, generalized muscle weakness, diplopia, blurred vision, ptosis, dysphagia, dysphonia, dysarthria, urinary incontinence and breathing difficulties.
- (d) Transmission of viral disease and variant Creutzfeldt-Jakob disease. There is a theoretical risk for transmission of Creutzfeldt-Jakob disease as the product used in Paragraph 1(b) contains albumin, a derivative of human blood.
- (e) Other specific risks include:

3. I consent to the administration of blood and blood products, if required, by any person qualified to do so. I understand that blood or blood products may be needed to correct anemia, replace blood lost during a procedure or to help my blood clotting. Uncommon reactions may include chills, fever or a rash. Rare but more serious conditions may be heart, kidney or other organ failure, a reaction due to blood incompatibility or acquiring an infectious disease such as Hepatitis or HIV (AIDS.) These procedures, possible alternatives such as autologous donations (donation of my own blood prior to a procedure), and their respective risks and benefits have been explained to my satisfaction.
4. I have disclosed any history of neurological diseases and disorders, such as myasthenia gravis, Lambert-Eaton syndrome, or amyotrophic lateral sclerosis. I have disclosed any known allergies including allergies to any botulinum toxin products. I also certify that I am responsible to inform my health care provider of any changes in my medical history or conditions such as pregnancy to ensure that my health care provider has the most up to date medical history prior to engaging in the procedures in Paragraph 1.
5. No warranty or guarantee has been given to me by anyone as to (a) the results of the procedures in Paragraph 1, or (b) the fitness or quality of any drug, anesthetic, blood or blood product or other substance to be used in those procedures.
