

SCREENING RETINAL PHOTO AUTHORIZATION:

Our doctors recommend a screening digital retinal photo be taken yearly as part of your comprehensive exam.

Screening photos are not covered by vision or medical insurance. The purposes of these photos are to:

- Document your retinal health to establish a baseline to which future retinal exams can be compared to detect changes over time.
- Help detect subtle retinal and optic nerve abnormalities that may affect vision and ocular health.

I understand that this retinal photo does not take the place of a retinal exam by the doctor.

_____ I agree to pay the \$39 fee for these screening retinal photos.

_____ I decline these screening retinal photos
